

MARKET BEGAN DRY WITH RUSH

Nearly Half a Million Shares of Stocks Sold During First Hour.

TRADING DULL AFTER THAT

Peace Conference and Yellow Fever Situation Among the Influential Factors.

(By Associated Press.)

NEW YORK, August 17.—Nearly half a million shares of stocks were sold today in the first hour's dealings on the Stock Exchange. The extreme animation during this period of the session was convincing evidence of the growth of speculative interest. The accumulated buying demand was fed steadily during the whole of the first hour in the process of realizing profits. The result was a growing tendency to yield, which became more marked as the accumulated buying orders were worked off. But when this condition of affairs began to be evident, there was a discommodation of the pressure to sell, which threw the market of the middle portion of the day into dullness.

Each day's news added to the confidence in the prosperous outcome of the grain crops, and the grain carriers held their conspicuous place in the day's market. Stocks of Eastern railroads were notably held back by the pressure to realize, reading being the consensus of opinion, although that stock touched a new high record during its period of strength. So did Erie, which was the strong exception in the group. Union Pacific was again very conspicuous and was the subject of the most talk of deals and of mysterious developments. A special factor in this Southern group was the belief that the yellow fever epidemic in New Orleans had come under control.

The peace conference at Portsmouth was the subject of attentive consideration under the belief that the critical stage of the negotiations had arrived. The favorable condition reported by the authorities in the United States and steel industry had its effect on the stocks of companies connected with various branches of the armament trade. The extra dividend on United States Reduction and Refining explained the advance in the stocks of these companies. Reports that the proposed lead merger was again abandoned depressed National Lead and had a similar effect on American Smelting. The money market continued easy, and therefore received no attention in the market. The speculative process continued up to the close, which was made irregular by the heavy profit-taking in some of the stocks. The late rise of about a point in the United States Steel stocks and some others.

Bonds were steady; total sales, par value, \$3,880,000. United States 2's advanced 3-8 per cent. on the total sales of stocks to date amounted to 1,191,000 shares.
